Data Analysis with Python
Back End Development and APIs
JavaScript Algorithms and Data Structures
Scientific Computing with Python
Information Security

Moh Affan

Backend | DevOps | Python | NodeJs | Go | Rust
Sumenep, Jawa Timur, Indonesia

Ringkasan

As a skilled backend developer, I specialize in building robust, scalable solutions that power modern applications. My expertise in Rust, Python and Node.js enables me to create efficient, high-performing apps. I am deeply interested in the field of artificial intelligence, particularly in applying machine learning to develop innovative solutions that drive smarter technology. My passion for technology and continuous learning keeps me at the forefront of industry advancements, allowing me to contribute effectively to every project I undertake.

I am also a DevOps enthusiast, I do a lot of tasks of managing Linux Servers using Google Compute Engine, Google Cloud SQL and deliver services with Google Cloud Run.

Pengalaman

Badan Kepegawaian dan Pengembangan Sumber Daya Manusia
Kabupaten Sumenep

Perancang Sistem Informasi

September 2020 - Present (4 tahun 6 bulan)

Sumenep, Jawa Timur, Indonesia

I design and manage cloud-based systems, overseeing Google Compute Engine, Cloud SQL, Cloud Storage and Cloud Run to ensure scalability and efficiency. I develop and maintain REST APIs using Python Django, Actix and Diesel, while also building frontend applications for web (PHP and Svelte) and mobile (Flutter). Additionally, I architect and optimize systems for employee applications, focusing on performance, security, and seamless integration across platforms.

Dinas Pekerjaan Umum Bina Marga
